1. The following is an examiner's statement of reasons for allowance: The search report of October 10, 2003 has been considered in its entirety however the references are not considered to teach or fairly suggest the claimed invention. It is noted that the instant claims require crystalline phases in addition to a filler in the glass substrate.

Lapp (5,459,109) teaches glass substrates however is silent as to any filler or crystallized phases being present. EP 729922, equivalent to Kohli et al (5,741,746) teaches a glass substrate however fails to teach a filler and crystalline phases.

Japanese document 11-135899 teaches a glass ceramic material (crystalline phases) with a filler material however the boron oxide content of the glass is 4-7 wt% while the instant claims are limited to no greater than 2 wt%. Pinckney (6,248,678 and 5,968,857) teach glass ceramic substrates however fail to teach a filler material and have thermal expansions outside the claimed range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
